THE DEVELOPMENT OF A NEW SOFTWARE

The new company Qlic, based in Le Creusot, is very proud to announce the development of a new software, after meeting this afternoon. It will give to a company a tool to manage its products and its clients. Also, it will permit to its customers to by also with this application. Here are the main functionalities that the software will provide for each user:

STOCK MANAGER

-Add new products

-Modify/ Delete products

-Check and Modify the stock

SALES MANAGER

-See the Total sales

-See the category/product wise

-See the customers wise

CUSTOMERS

-Browse the products (search with a bar, sort)

-Use a cart and buy products

-Have a login and a password

-Can let review and feedback

-Modify his profile and select the language (these functionalities are under debate by our team).

We will provide you more information in the next days, when the project start.

Please give us some feedbacks about the software; we need to know the requirement of future buyers.

The developing team from Qlic
